

smooth gliding, aluminium panoramic doors
with thermal performance built-in

warmcore[®]
INLINE PATIO DOOR

**THERMAL PERFORMANCE IS
BUILT INTO THE CORE OF THESE
BEAUTIFUL PANORAMIC DOORS**

WarmCore inline patio doors allow natural light to flood in to your home through large glazed sashes that maximise the enjoyment of your view. The full width thermal core at the heart of the WarmCore range lets you enjoy the desirability and durability of aluminium, while keeping your home snug and warm. Custom designed 10 wheel rollers glide effortlessly on a precision engineered track, making these panoramic doors the perfect blend of aesthetics and performance.

U 1.0

With triple glazed U-values (used to calculate thermal efficiency) as low as 1.0 and double glazed values of 1.4, your WarmCore patio will help keep heating bills low.

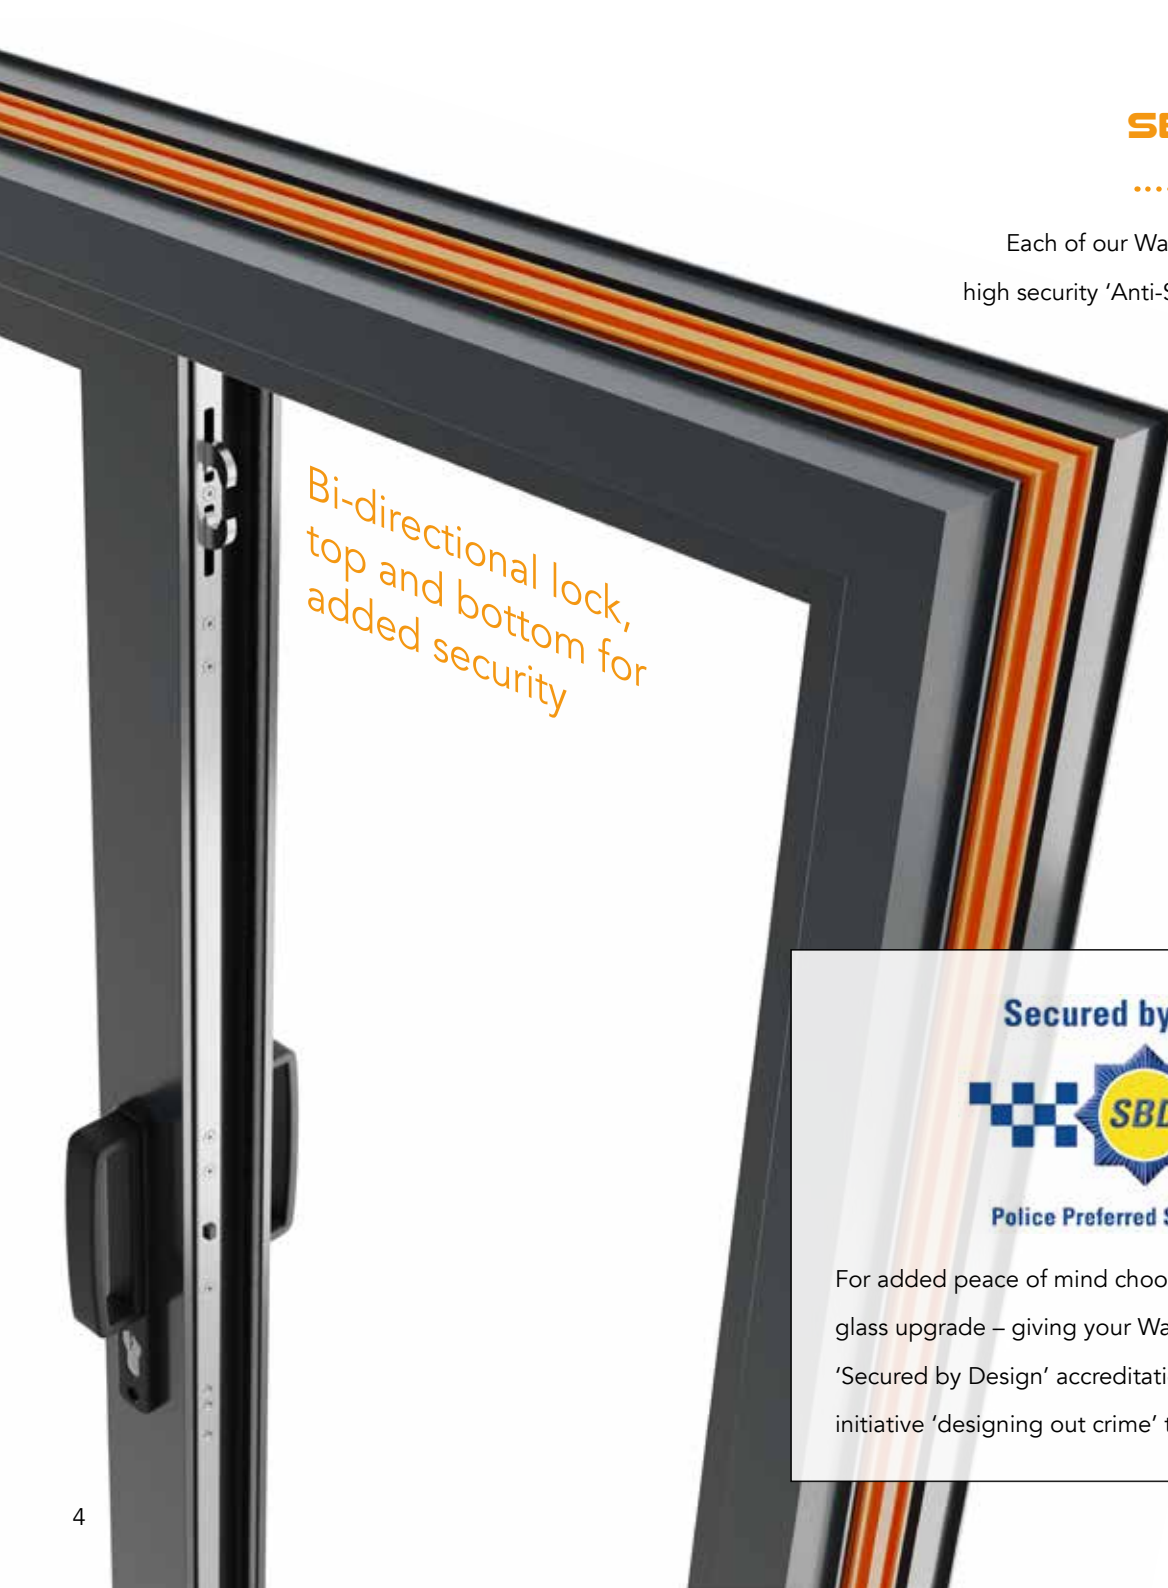

NEXT GENERATION INLINE DOORS

.....

10 year

Peace of mind comes from a comprehensive 10 year guarantee covering surface finish and mechanical operation direct from the manufacturer.

Bi-directional lock,
top and bottom for
added security

SECURITY BUILT-IN

Each of our WarmCore patio doors are fitted with a high security 'Anti-Snap' and 'Anti-Bump' Yale Platinum 3 Star cylinder, designed to provide maximum security against known cylinder attack methods.

Stainless Steel handle available June 2018

INNOVATIVE HANDLE & LOCK

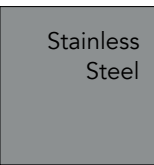

With an emphasis on clean, modern aesthetics we custom designed a high quality 'lift-to-lock' handle, unique to the WarmCore patio. This innovative handle operates the bi-directional locks located at the top and bottom of the door. These 'claws' make WarmCore patios incredibly secure, helping protect you and your home.

Secured by Design

Police Preferred Specification

For added peace of mind choose the optional laminate glass upgrade – giving your WarmCore patio doors 'Secured by Design' accreditation - the official UK Police initiative 'designing out crime' through physical security.

YOUR CHOICE OF COLOUR - INSIDE AND OUT

WarmCore inline patios are available in a choice of two hard wearing powder coated colours; Anthracite Grey (RAL 7016) and Pure White. Your choice of external and internal colour helps you match the look of your home inside and out.

A choice of threshold options, which can be combined with various sill configurations, let you find the ideal solution for your requirements.

CLEAN, CONTEMPORARY LINES

.....

We've brought the classic sliding patio door up-to-date with clean lines, a flush finish and a hard-wearing aluminium exterior, combining architectural appeal with practicality. With two, three and four pane configurations you can choose a style that suits both your home and living style, bringing the outside in during summer months and keeping the cold out during the winter.

SUPER SMOOTH OPERATION

10 wheel roller

The WarmCore inline patio uses a unique, high-quality wheelset with each sash running on 10 self-levelling rollers to give you ultra-smooth, reliable performance. The wheels have been tested to 50,000 cycles, so you know your doors will be running effortlessly for years to come.

SAFETY FIRST

Our modern safety brakes are an optional add-on to prevent trapped fingers and unintentional slamming, particularly useful when children are around. Carefully engineered, these built in safety brakes guarantee soft, dampened operation, helping prevent misuse.

NEXT GENERATION INLINE PATIO

ZMWCP/PATIORETAILBROv1.2

A dark, almost black background graphic for an advertisement. It features several parallel orange lines that create a sense of depth and perspective, mimicking the profile of a door or window frame. The text is positioned in the upper right and lower right areas.
